

TELMEK
GLOBAL RESOURCES

OIL & GAS SERVICES

ABOUT US

Telmek Global Resources (TGR) is an indigenous Oil and Gas Servicing Company in Nigeria. With our dynamic team of professionals in strategic management areas, we fully understand market requirements and are renowned for the level of support we provide to our clients and their operations.

Gaining comparative advantage in the industry can be quite a challenge, requiring significant amount resources such as knowledge, time, tools and skills to get it right. We understand this challenge and that's where we come in. With continued dedication from our team of professionals, we strive to nurture cordial relationships and maintain a positive 'will do' attitude.

Our philosophy is to develop our organization within the framework of an intimate and reliable company mentality. This enables us to be agile and respond promptly to customers needs.

SERVICES

Procurement, Installation & Maintenance

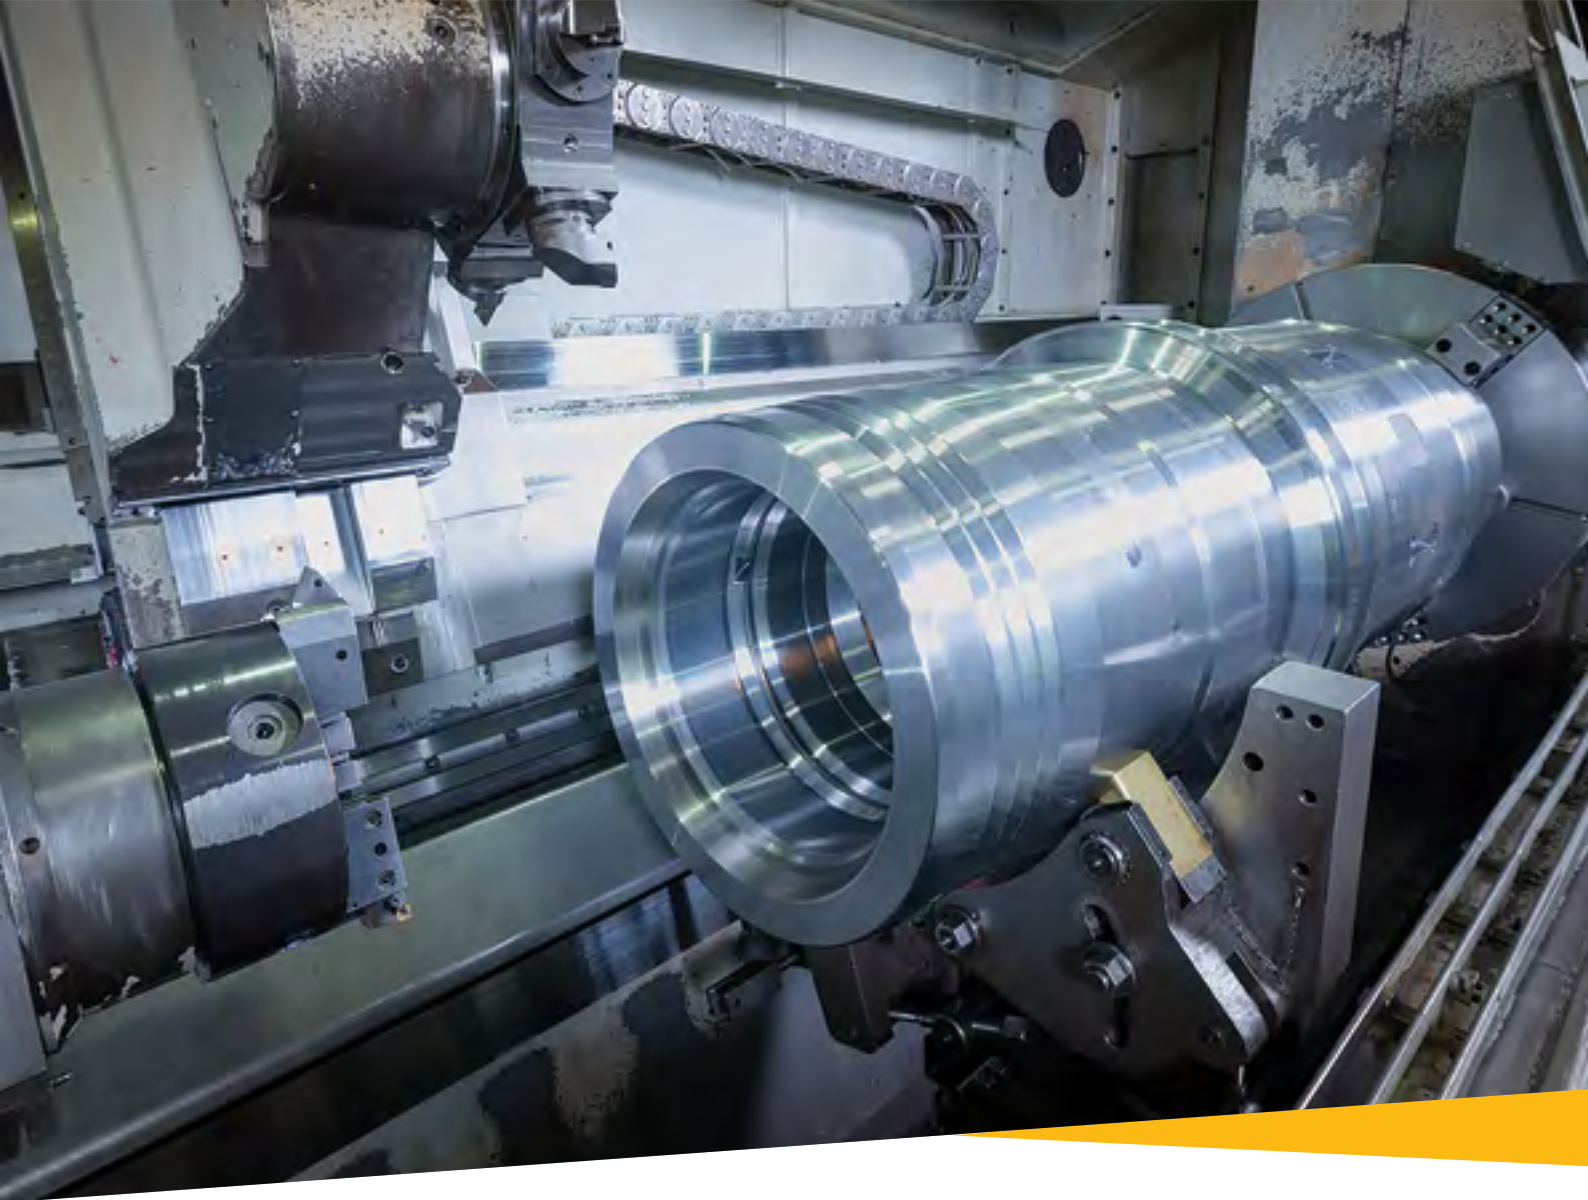

We are dedicated to ensuring that all supplies, materials and equipment are procured with the optimum combination of price, quality, availability and installed accurately. We work closely with our clients to establish the parameters and objectives of their projects, also contributing vast international experience of IRM (Inspection, Repairs & Maintenance) and decommissioning projects.

- OCTG/Pipes
- Subsea Equipment
- Separators
- Valves
- Christmas Trees

Project Management Services

Our Project management team consists of a dedicated project manager, project engineer, and design team to manage each project from start to finish. Whether it's a construction or engineering project, our dedicated team is sure to see your project to its finish line.

The project manager is the single point contact with the client. Our expert Technocrats work closely with the industry's design engineers to develop and manufacture new products with superior quality.

Commissioning Services

Our Commissioning services play a vital role in reducing project cost to minimum and to enhance comfort and safety. Our services are independent and customer focused.

We utilize the latest high-tech tools to streamline commissioning processes so we can focus on operational and efficiency issues such as process controls and equipment operations. We offer the following commissioning services:

- Project Control development
- Supervision and engineering in all disciplines
- Providing technicians in Mechanical, Instrumentation, Electrical, Process etc.
- Project data entry
- Project Certification & handover

Protocol and Logistics Services

We are specialists in providing excellent protocol, logistics, & travel services. Protocol services include meet and greet, flight booking, reservation, car hire, travel and tour, security escorts and many more. Logistics services include: air freight, inland freight services and ocean freight services.

Our Partners

Telmek Global Resources has in place strategic technical agreements and established relationships with a number of OEMs to enable us provide high quality and competitive services
The company understands its client's needs and is able to respond promptly on every instance. We also welcome new alliances and partnerships necessary for the development of the emerging Nigerian Oil and Gas Industry.

TELMEK GLOBAL RESOURCES LIMITED

In Partnership With

SUBSEA 100 GLOBAL *And* VI ENERG RESOURCES

SUBSEA 100 GLOBAL LIMITED

Subsea 100 Global is an EPC company with operating offices in America, UK and Africa and is made up of a team of young and advanced professionals whose wealth of experience in the industry cannot be overemphasized. Their services are provided with functionality and safety as key factors. They consistently achieve this by utilizing top of the class equipment, operated by experienced technocrats from surface positioning to subsea operations. This also includes data acquisition and interpretation of seabed features (seismic, geo-physical engineering and subsea construction).

VI ENERG RESOURCES PVT LIMITED

Vi Energ Resources pvt Ltd is an EPC company with operating offices in Saudi Arabia, Norway, Oman, Dubai, India and a team of technocrats who have more than 20 years rich experience in developing projects within the Upstream Oil & Gas industry. The company is also a manufacturer of skid mounted equipment packages and offer services to suit surface well testing and Upstream oil and gas industrial requirements.

Our project team encompasses competent process, mechanical, electrical, instrumentation and structural engineers to deliver the complete package with high quality and fully in compliance with international standards to meet process requirements.

Engineering Services

TelmeK, in collaboration with its technical partners provide a wide range of engineering services to the public and private sectors. We deliver global engineering solutions specifically tailored to our client needs. Our multi-disciplinary competence is buoyed by a hi-tech workforce suitably positioned to respond to the dynamics and challenges of global business which our clients will benefit from. We work locally with a global thinking, having a policy accent on networking with companies locally and internationally. This way, we achieve synergies to always remain relevant in the global competitive market. Some of our engineering services include:

- Detailed Process design
- Mechanical and Structural design
- Electrical and Instrumentation design
- Modeling and Drafting
- FPSO motion Analysis
- Hazop Studies
- Quality Management
- Piping/pipeline design

Fabrication And Construction Services

At Telmek, we have in place continuous improvement methods that are active in all fabrication processes. Our services cover fabrication and installation of process pipes; fabrication, construction and installation of pipelines as well as structural steel fabrications.

Manpower Supply

Telmek in collaboration with its partners, are able to supply fully trained, qualified and experienced personnel with broad range of disciplines to various organizations as the need arises. We have low, mid to high level highly skilled personnel with global industry experience at our disposal who are able to provide cost effective professional support to clients and their projects in the Nigerian Oil and Gas Industry.

Whatever your manpower needs may be, our multi discipline data base for technical assistance offers various profiles in Exploration and Drilling, Engineering, Construction, Maintenance and General operations.

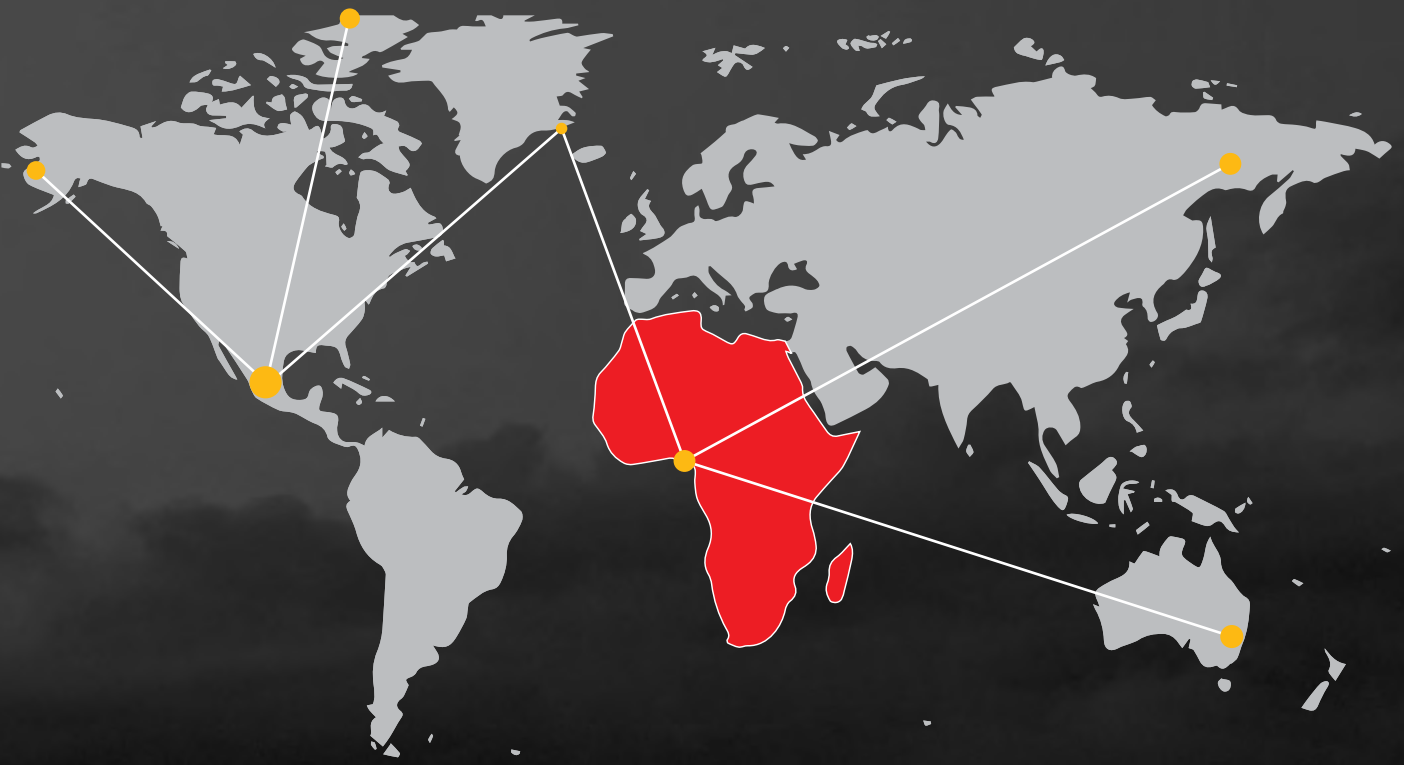

Waste Management

Telmek Global Resources in partnership with its sister company, provides waste management services in the Nigerian Oil and Gas industry and has available waste management packages that deliver integrated solutions for drilling waste and produced water waste management requirements.

Water produced from oil and gas exploration, production and decommissioning activities which does not meet strict offshore standards for being discharged to sea (In some cases produced water may also contain Naturally Occurring Radioactive Material), is transferred for treatment and disposal. We have the capacity to receive large volumes of drilling mud and bulk liquids before transferring them for further treatment.

Well Head Inspection And Maintenance

Mechanical assemblies are susceptible to corrosion, wear and tear and other unforeseen damages. It is therefore essential that plans are put in place for routine wellhead installation maintenance operations such that problems can be identified from the onset and remedied quickly. Telmek and its technical partners are skilled to adequately service and maintain wellhead and Christmas tree assemblies to confirm the integrity is fit for purpose and ensure surface barrier against hydrocarbon leakage and reliability in an emergency situation.
