

OIL & GAS SERVICES

ABOUT US

Telmek Global Resources (TGR) is an indigenous Oil and Gas Servicing Company in Nigeria. With our dynamic team of professionals in strategic management areas, we fully understand market requirements and are renowned for the level of support we provide to our clients and their operations.

Gaining comparative advantage in the industry can be quite a challenge, requiring significant amount resources such as knowledge, time, tools and skills to get it right. We understand this challenge and that's where we come in. With continued dedication from our team of professionals, we strive to nurture cordial relationships and maintain a positive 'will do' attitude.

Our philosophy is to develop our organization within the framework of an intimate and reliable company mentality. This enables us to be agile and respond promptly to customers needs.

SERVICES

Procurement

We are dedicated to ensuring that all supplies, materials and equipment are procured with the optimum combination of price, quality, availability and installed accurately. We work closely with our clients to establish the parameters and objectives of their projects, also contributing vast international experience of IRM (Inspection, Repairs & Maintenance) and decommissioning projects.

Engineering Support

Telmek, in collaboration with its technical partners provide a wide range of engineering services to the public and private sectors. We deliver global engineering solutions specifically tailored to our client needs. Our multi-disciplinary competence is buoyed by a hi-tech workforce suitably positioned to respond to the dynamics and challenges of global business which our clients will benefit from. We work locally with a global thinking, having a policy accent on networking with companies locally and internationally. This way, we achieve synergies to always remain relevant in the global competitive market. Some of our engineering services include:
